

CUPBOARDS Completely metallic modular structure. Open versions, closed versions with leaf doors, with metal sliding doors, glass and metallic net. The interior accessories include mobile metal shelves for containing suspended files for vertical reading with a distance between centre of 33 cm. Easy glide interlocking shelf dividers are available. The cupboards are available in various lengths and heights, in three basic depths of 35 and 45 and 60 cm. The glass panels in the sliding doors are either tempered. All the doors are always fitted with locks. Cupboards with an upper extension can be fitted with a sliding ladder mounted on tracking. The cupboards are available in the following finishes: Grey Ral 7035, Ivory Ral 1013, Grey anthracite Ral 7016, and Grey aluminium Ral 9006. The sliding doors are available in colours: red, white and green. The upper extensions can be fitted with melamine tops which are available in the standard Socam finishes.

TAMBOUR CABINETS Completely metallic modular structure. The closed system is made up of a plastic tambour that runs along guides fixed in the top and base. The doors are equipped with a central reinforcement with a handle and Yale type lock.

FILING CABINETS Comprising a completely metallic structure and available as a single or modular units. Equipped with central locking for all drawers, with a device to prevent tipping and the possibility to open one drawer at a time. Every drawer is fitted with supports to hold suspended files with a distance between centres of 33 or 39 cm. The interior accessories include dividers for the whole width of the drawer and to create two rows. The cabinets are available in the following finishes: Grey Ral 7035, Ivory and Grey anthracite Ral 7016.

CARD INDEX CABINETS Available in two heights, they have a completely metallic structure and are equipped with central locking for all drawers. Some versions can also be fitted with an individual lock for each compartment. Available in light grey finish only.

SECURITY Cabinets with modular metallic structure available in two sizes. All cabinets are fitted with a two way locking system that closed the cabinet vertically and horizontally and a version with combination lock is also available. A range of accessories is available in addition to standard interior shelves. Available in light grey finish only.

SHELVING Two kinds of shelving units are available, bolted or interlocking. Both hook-on and bolted shelves are reinforced adequately for the size of each individual shelf and can be fitted with an interlocking vertical divider. The programme includes containers, created using standard shelves with the addition of interlocking side panels and longitudinal panels. The shelving units can be fitted with a sliding ladder mounted on tracking. The entire shelving programme is available in Grey Ral 7035.

LOCKERS Completely metallic structure for use as changing room lockers or multipurpose cabinets. Available in Grey Ral 7035 with interior accessories to suit the use to be made.

CANTEEN TABLE The structure is made up of tubular steel legs cm 40x40, joined by melt bands. The complete table is very strong and ideal for the intended use. The table top h. mm 25 is made of melamine with rounded edges in compliance with the standard in force.
